

Every graph, in build order.

All 55 charts (plus the 8 KPI cards) of the dashboard, sequenced so each one only depends on things already built before it. For each: the data it needs, what it does, and the question it answers. Top-bar, source and filter controls are intentionally excluded — this is the visualization layer only.

ORDERING RULE The sequence runs by **dependency**: build the shared computations once (equity series, daily P&L grouping, per-trade R, gross win/loss), then simple aggregates → derived summaries → excursion → behaviour → prop → simulation → live/multi-source. Follow it top to bottom and **no chart will ever need something that isn't built yet**.

63 items · 8 KPI cards + 55 charts · grouped into dependency stages, numbered continuously

#	GRAPH / CHART	DATA NEEDED	WHAT IT DOES	WHAT IT ANSWERS
---	---------------	-------------	--------------	-----------------

Stage 0 · Build these shared computations FIRST

Every chart below reuses them — building them once is what prevents duplicated, conflicting logic. Not charts; build as utilities.

SHARED UTILITIES

Ordered equity series (startingBalance + running Σ pnl) · Daily P&L aggregation (group trades by date) · Per-trade R (rMultiple) · Gross win / gross loss (sum of +pnl, lsum of -pnl). Build once, import everywhere.

KPI stat cards

Atomic readouts reused by many charts. Quick to build; several derive from the Stage-0 utilities.

1	Net P&L KPI	trade.pnl, costs/commission	Sums filtered profit after costs	Did this source make money, and how much?
2	Return % KPI	netPnl, startingBalance	Net P&L as % of starting capital	Is the result meaningful vs account size?
3	Trade Win Rate KPI	outcome per trade (win/loss counts)	Share of trades that closed profitable	How often does this strategy win?
4	Day Win Rate KPI	trade.date + daily P&L aggregation	Share of trading days that ended green	Is performance steady by day or concentrated?
5	Profit Factor KPI	gross win, gross loss	grossWin ÷ grossLoss	Is the strategy structurally profitable?
6	Avg R KPI	trade.rMultiple	Mean R-multiple per trade	Does the edge survive position-size normalization?
7	Max Drawdown KPI	equity series, startingBalance	Worst peak-to-trough decline (\$ and %)	How painful was the worst decline?
8	Trades / Duration KPI	trade count, trade.duration	Count + average hold time	Is the sample big enough? How long are trades held?

#	GRAPH / CHART	DATA NEEDED	WHAT IT DOES	WHAT IT ANSWERS
Core performance charts				
Built from Stage-0 utilities + scalar trade fields. The backbone of the Overview, Performance and The Numbers pages.				
9	Equity Curve OVERVIEW / PERFORMANCE	ordered trades, pnl, startingBalance, date	Plots cumulative account equity in order	Is the account rising smoothly? Where are the drawdowns?
10	Drawdown Curve OVERVIEW / PERFORMANCE	equity series, running peak	Plots decline below the prior equity peak	How deep and how long are the losing phases?
11	Win / Loss Donut OVERVIEW	win / loss / breakeven counts	Ring showing win-rate share	Is the win rate high enough for the strategy style?
12	R-Multiple Distribution OVERVIEW / THE NUMBERS	rMultiple per trade	Histogram of outcomes by R bucket	Built on many small edges or a few outliers?
13	Daily P&L Heatmap OVERVIEW / THE NUMBERS	date, daily P&L, trades per day	Calendar blocks coloured by daily result	Which days were good/bad? Are losses clustered?
14	Performance Breakdown OVERVIEW / THE NUMBERS	group field (symbol/market/session/tag/setup), pnl, trades, win rate	Bar rows per chosen grouping	Which category contributes most profit or loss?
15	Performance Calendar THE NUMBERS	date, day-of-week, hour, pnl	Day × time performance grid	Which day/time combinations are strongest/weakest?
16	Cross-Analysis THE NUMBERS	chosen group key (hour/weekday/symbol/session/tag), pnl, outcome	On-demand conditional grouped analysis	What happens if I slice wins/losses by X?
17	Win/Loss Distribution THE NUMBERS	outcome, pnl, R	Shape of win sizes vs loss sizes	What is the payoff ratio and outcome shape?
18	Consistency PERFORMANCE	daily rows, equity series, rolling metrics	Reads stability across time and trades	Consistent, or dependent on a few periods?
19	Streaks & Records PERFORMANCE	ordered outcomes, pnl, duration	Win/loss runs + record stats	Are losses clustering? What are best/worst records?

#	GRAPH / CHART	DATA NEEDED	WHAT IT DOES	WHAT IT ANSWERS
Journal				
Row-level review. Cheap to build, high value; the bridge from aggregate numbers back to individual trades.				
20	Trade Journal table JOURNAL	id, date, symbol, side, R, pnl, exit status, tag, notes/screenshots	Sortable row-level table of trades	Which exact trades should I review?
21	Filtered Summary JOURNAL	filtered trade list, pnl, win/loss, Avg R	Aggregate of just the visible trades	What does the current selection add up to?
Decision summary				
Derived/composite visuals — build AFTER the inputs above exist (the Talaria Score composes them, so it comes last in this group).				
22	Risk-Adjusted strip PERFORMANCE	daily returns, drawdown, R	Sharpe, Sortino, Calmar, Recovery Factor	Is the strategy good after risk adjustment?
23	Rule Adherence panel OVERVIEW	rulesFollowed, rulesViolated, pnl, R, outcome	Compares trades that followed vs broke rules	Are rule breaks costing performance?
24	Goal Tracker OVERVIEW	current return, target return, capital, time elapsed	Progress toward the target	On track to hit the goal / challenge target?
25	No-Go Flags OVERVIEW	drawdown thresholds, sample size, rule breaks, expectancy, prop rules	Surfaces critical / cautionary warnings	What should stop me scaling this source?
26	Edge Finder OVERVIEW / EDGE & BEHAVIOUR	grouped metrics by symbol/tag/time/session/rule status, expectancy, win rate, pnl	Plain-language strengths/weaknesses + detected patterns	What is the first actionable insight?
27	Talaria Score OVERVIEW	net P&L, return%, profit factor, drawdown, trade count, rule adherence, expectancy, prior-period metrics	Composite health score & tier (Strat / Exec)	Is the source healthy overall? Which dimension is weak?
Execution & excursion				
Need MAE/MFE, planned/actual RR, and the per-bar excursion arrays. Build the MAE/MFE family together — they share inputs.				
28	MAE Distribution TRADE QUALITY	mae (mae_r) per trade	Histogram of adverse excursion (winners vs losers)	Where does the optimal stop boundary sit?
29	MFE Distribution TRADE QUALITY	mfe (mfe_r) per trade	Histogram of favourable excursion	Are winners left on the table? Management problem?

#	GRAPH / CHART	DATA NEEDED	WHAT IT DOES	WHAT IT ANSWERS
30	MAE / MFE Scatter TRADE QUALITY	mae, mfe, pnl, R	Each trade plotted MAE vs MFE	Are stops/targets efficient? Are winners run?
31	Capture Ratio Histogram TRADE QUALITY	capture_ratio (actual_rr / total_mfe_r)	Distribution of capture efficiency	What % of the available move did I capture?
32	What-If Bars TRADE QUALITY	actual_rr, mfe_r, total_mfe_r (winners)	Got vs available—during vs available—total, with gaps	How much R is lost to management vs exit timing?
33	Post-Exit MFE Curve TRADE QUALITY	post_checkpoints[] / post-exit price, exit, outcome	Avg additional MFE after exit (winners vs losers)	Should I hold longer? Was the TP well placed?
34	Execution Analysis TRADE QUALITY	plannedRR, actualRR, entryQuality, exitQuality, pnl	Planned vs actual R:R + quality scores	Am I executing the plan or degrading it?
35	Management Quality TRADE QUALITY	exit reason, post tags, be_triggered, trail_activated, partials, R, pnl	Early/late exits, stop mistakes, partials	Where does management add or lose R?
36	Price Behaviour Explorer TRADE QUALITY	pre/post-entry price series (bar_close_r[]), entry timestamp, outcome	Avg price paths around entries	Do winners and losers behave differently after entry?

Behaviour & edge

Tag- and sequence-based diagnostics; mostly rolling computations over the ordered trade set.

37	Behavioural Tags EDGE & BEHAVIOUR	preTags, postTags, tag values, pnl, outcome	Performance grouped by behaviour/tag	Which behaviours help or hurt the strategy?
38	Patterns & Behaviour EDGE & BEHAVIOUR	tags, rule adherence, reason, outcome, pnl	Detects behavioural patterns that add/remove edge	Which patterns should I fix or repeat?
39	Edge Decay EDGE & BEHAVIOUR	ordered trades, rolling R/expectancy window	Rolling expectancy line	Is the edge improving, flat, or fading?
40	Strategy Health EDGE & BEHAVIOUR	score dimensions, expectancy, sample size, drawdown, filters	Reads breadth, stability, scalability of the edge	Is the edge broad, stable and scalable?

#	GRAPH / CHART	DATA NEEDED	WHAT IT DOES	WHAT IT ANSWERS
Prop challenge				
Only render for prop-mode sources. Needs the prop preset fields.				
41	Prop Rules / Compliance Tracker PROP CHALLENGE	prop preset (target, daily loss, max DD, min days), capital, daily P&L, equity, trading days	Rule table with pass/fail + rule nearest to failing	Is the challenge passing, failing, or at risk?
42	Prop Status Pressure PROP CHALLENGE	prop rules, capital, daily P&L, drawdown, profit target, trading days	Live pressure banner	How close am I to target vs the limits right now?
43	Pass Probability PROP CHALLENGE	trade return/R distribution, target, drawdown rules, sim settings	Estimates chance of passing if the distribution continues	How likely am I to pass?
Advanced & simulation				
Heaviest builds — simulation, price-series and matrix views. Build last so they consume stable upstream series rather than fighting them.				
44	Runs Test PERFORMANCE	ordered outcomes, wins, losses, streak lengths	Tests sequence randomness / clustering	Are wins/losses random or clustered?
45	Sequence Risk PERFORMANCE	trade pnl/R, loss count, longest loss run	Stress- tests bad ordering and loss runs	What if the worst losses happen first?
46	Advanced Distributions PERFORMANCE	drawdown points, gross win/loss, expectancy, Avg R	Drawdown frequency + risk metrics	How often does drawdown occur? What is the risk profile?
47	Trade Microscope EDGE & BEHAVIOUR	duration, volatility regime, trend regime, pnl, win rate	Breaks trades by market condition	Which conditions produce good trades?
48	Macro Event Correlation EDGE & BEHAVIOUR	nearbyNewsEvent, event category/time, pnl	Trades near news/events	Are news events helping or hurting?
49	Correlation Matrix STRATEGY & SOURCES	symbol-level return series or grouped returns	Relationship between symbols/sources	Are losses correlated across instruments?
50	3D Heatmap THE NUMBERS / STRATEGY & SOURCES	symbol, session/time bucket, performance score or pnl	Matrix-style intensity visualization	Which symbol/session combinations stand out?
51	Monte-Carlo Projection WHAT-IF LAB	trade returns/R, capital, prop targets, simulation count	Many simulated equity paths	Ruin/pass risk if trade order changes? Outcome range?
52	What-If Simulator WHAT-IF LAB	bar_high_r[], bar_low_r[], trade R/pnl, tags, rule status	Movable TP/SL lines over excursion bars, live recompute	Which stop/target change improves results most?
53	Alternative Strategies WHAT-IF LAB	original trades + simulated include/exclude rules	Compares modified rule sets vs original	Would a rule change beat the original?

#	GRAPH / CHART	DATA NEEDED	WHAT IT DOES	WHAT IT ANSWERS
54	Expectancy Heatmap WHAT-IF LAB	bar_high_r[] / bar_low_r[] (TP × SL replay)	Expectancy grid over TP/SL combinations	What is the best TP/SL zone?
55	Simulated vs Actual Equity WHAT-IF LAB	actual equity_curve[], simulated equity from new TP/SL	Dual equity lines + shaded gap	What is the dollar impact of the change?
Live & multi-source Depend on everything above plus live-journal data and cross-source hierarchy. Build last.				
56	Live Plan Adherence LIVE DISCIPLINE	live journal trades, rulesFollowed, rule breaks, strategy tag mapping	Checks live trades against strategy rules	Am I following the plan in live execution?
57	Edited Journal Status LIVE DISCIPLINE	journal edit flags, trade edit timestamps, connection/account id	Shows what live data was modified after import/sync	Is the live data clean and trustworthy?
58	Backtest vs Live Discipline LIVE DISCIPLINE	backtest baseline (planned/actual, adherence) + live equivalents	Execution-drift comparison	Am I executing live as well as in the backtest?
59	Source Reconciliation STRATEGY & SOURCES	source metadata, tag maps, symbol maps, account/currency info	Detects tag/symbol/scale/currency/date differences	Are these sources actually comparable?
60	Source Attribution STRATEGY & SOURCES	source list, source P&L, source trades	Each source's contribution to the total	Which source drives the combined result?
61	Backtest vs Live STRATEGY & SOURCES	backtest source, live source, shared strategy id, P&L series	Compares simulated vs live behaviour	Does live match the backtest?
62	Comparison View STRATEGY & SOURCES	main source metrics, compare source metrics	Full side-by-side of two sources	Which source is better, and where?
63	Report Builder STRATEGY & SOURCES	selected page ids, report section flags	Choose sections and export	What goes into the shared report?
